Experience

Analytics Team Lead | Product Analyst III

January 2026 - Present

Magic Touch Software - San Marcos, CA (Hybrid)

- Lead a five-person database analytics team by prioritizing workload, assigning projects by complexity and experience level, and mentoring team members.
- Own Salesforce reporting strategy for a 30-person business unit, designing dashboards for leadership, support teams, and individual contributors that reduced backlog by **80%**.
- Developed customer health dashboards tracking churn indicators including subscription changes, license reductions, and support trends, contributing to a **25% increase in retention**.
- Reduced ticket volume by **32%** and improved resolution time from **three weeks to one week** through KPI tracking, workload analysis, and operational reporting.
- Standardized reporting fields and metrics while translating business requirements from executives and customers into SQL, Crystal Reports, and analytics solutions.
- Implemented an AI-assisted documentation workflow for legacy SQL stored procedures and Crystal Reports, analyzing report logic and dependencies to improve documentation quality and reduce manual effort.

Product Analyst III

March 2025 - January 2026

- Built Tableau dashboards and Snowflake-based reporting solutions analyzing customer retention, product usage, and operational performance.
- Developed SQL stored procedures, data models, and Crystal Reports by gathering requirements from customers and business stakeholders.
- Analyzed customer behavior, product usage, and operational metrics to identify retention trends and reporting opportunities.

Product Analyst I

October 2022 - March 2025

- Developed SQL queries and Crystal Reports supporting customer reporting needs and database operations.
- Investigated reporting issues and improved data accuracy through database troubleshooting and validation.

Data Analyst

Jan 2019 - Jun 2022

Dream Lab - Goleta, CA

- Taught SQL, Python, Tableau, and emerging analytics tools through technical workshops, reducing repeat training needs by 36%.
- Collaborated with *twarc* developers via GitHub to troubleshoot Python tools and improve documentation.

Projects

SaaS Customer Churn Analysis

Snowflake, SQL, Python, Tableau

- Built a Snowflake and SQL analytics workflow with Python to analyze SaaS customer retention, product usage, and churn risk factors.
- Developed Tableau dashboards to visualize customer health metrics and retention trends.

Skills

Programming & Querying

Analysis & Modeling

Visualization and Reporting

Tools and Platforms

SQL (CTEs/Window Functions), Python

Cohort Analysis, Retention Analysis, Churn Analysis, A/B Testing

Salesforce, Tableau, Excel, Crystal Reports

GitHub, Git, Snowflake, Google BigQuery

Certifications

Google Data Analytics Professional Certificate

Jun 2025

Education

University of California, Santa Barbara

Statistics and Data Science B.S.

Sep 2018 - Jun 2022
